CROSSWALK BEACON
Model SLI-132-D12

Solar Lighting International’s Crosswalk Warning Beacon System features two 12” ultra-bright amber colored LEDs to draw drivers’ attention to the crosswalk warning sign. Our beacons come with auto dimming and multi-stage battery charger features built into our smart controller.

Crosswalk Beacons are operated by wireless push button activation. When a pedestrian pushes the button, the LEDs are activated on both sides of the street and begin flashing to warn drivers of crossing pedestrians.

Wireless communication provides easy installation.

Utilizes the most up to date solar and electronics to maintain power levels through rain, shine, sleet, or snow.

LED technology increases life expectancy of the beacon and also burns less energy than conventional bulbs.

Meets MUTCD (Manual on Uniform Traffic Control Devices).

Our beacon system meets the Safe Routes to School (SRTS) infrastructure funding models.

NCHRP 350 Crash Tested and Accepted (National Cooperative Highway Research Program)

Meets ITE Standards (Institute of Transportation Engineers)
