

HIGH WATER SENSOR

Solar Lighting International's Sign Alerts™ can be equipped with a high water sensor that is ideal for those locations that are notorious for high water conditions that could cause accidents. With Sign Alert and the high water sensor attachment, accidents are kept to a minimum in those areas because drivers are cautioned of road conditions. The operation is simple: the high water sensor activates the Sign Alerts LEDs when the sensor detects high water levels above the sensor, and the system is deactivated once the water level lowers below the sensor.

FEATURES

- Automatic light output for maximum efficiency
- Weather proof enclosure
- Detects rising water levels to trigger LEDs to flash
- Super bright LEDs
- Ultra slim design
- Simple installation
- Solar power allows this system to be used virtually anywhere
