

THE HOA APPROACH

THE SHIFTING COURSE
OF LUXURY REAL ESTATE
AND SOLAR LIGHTING

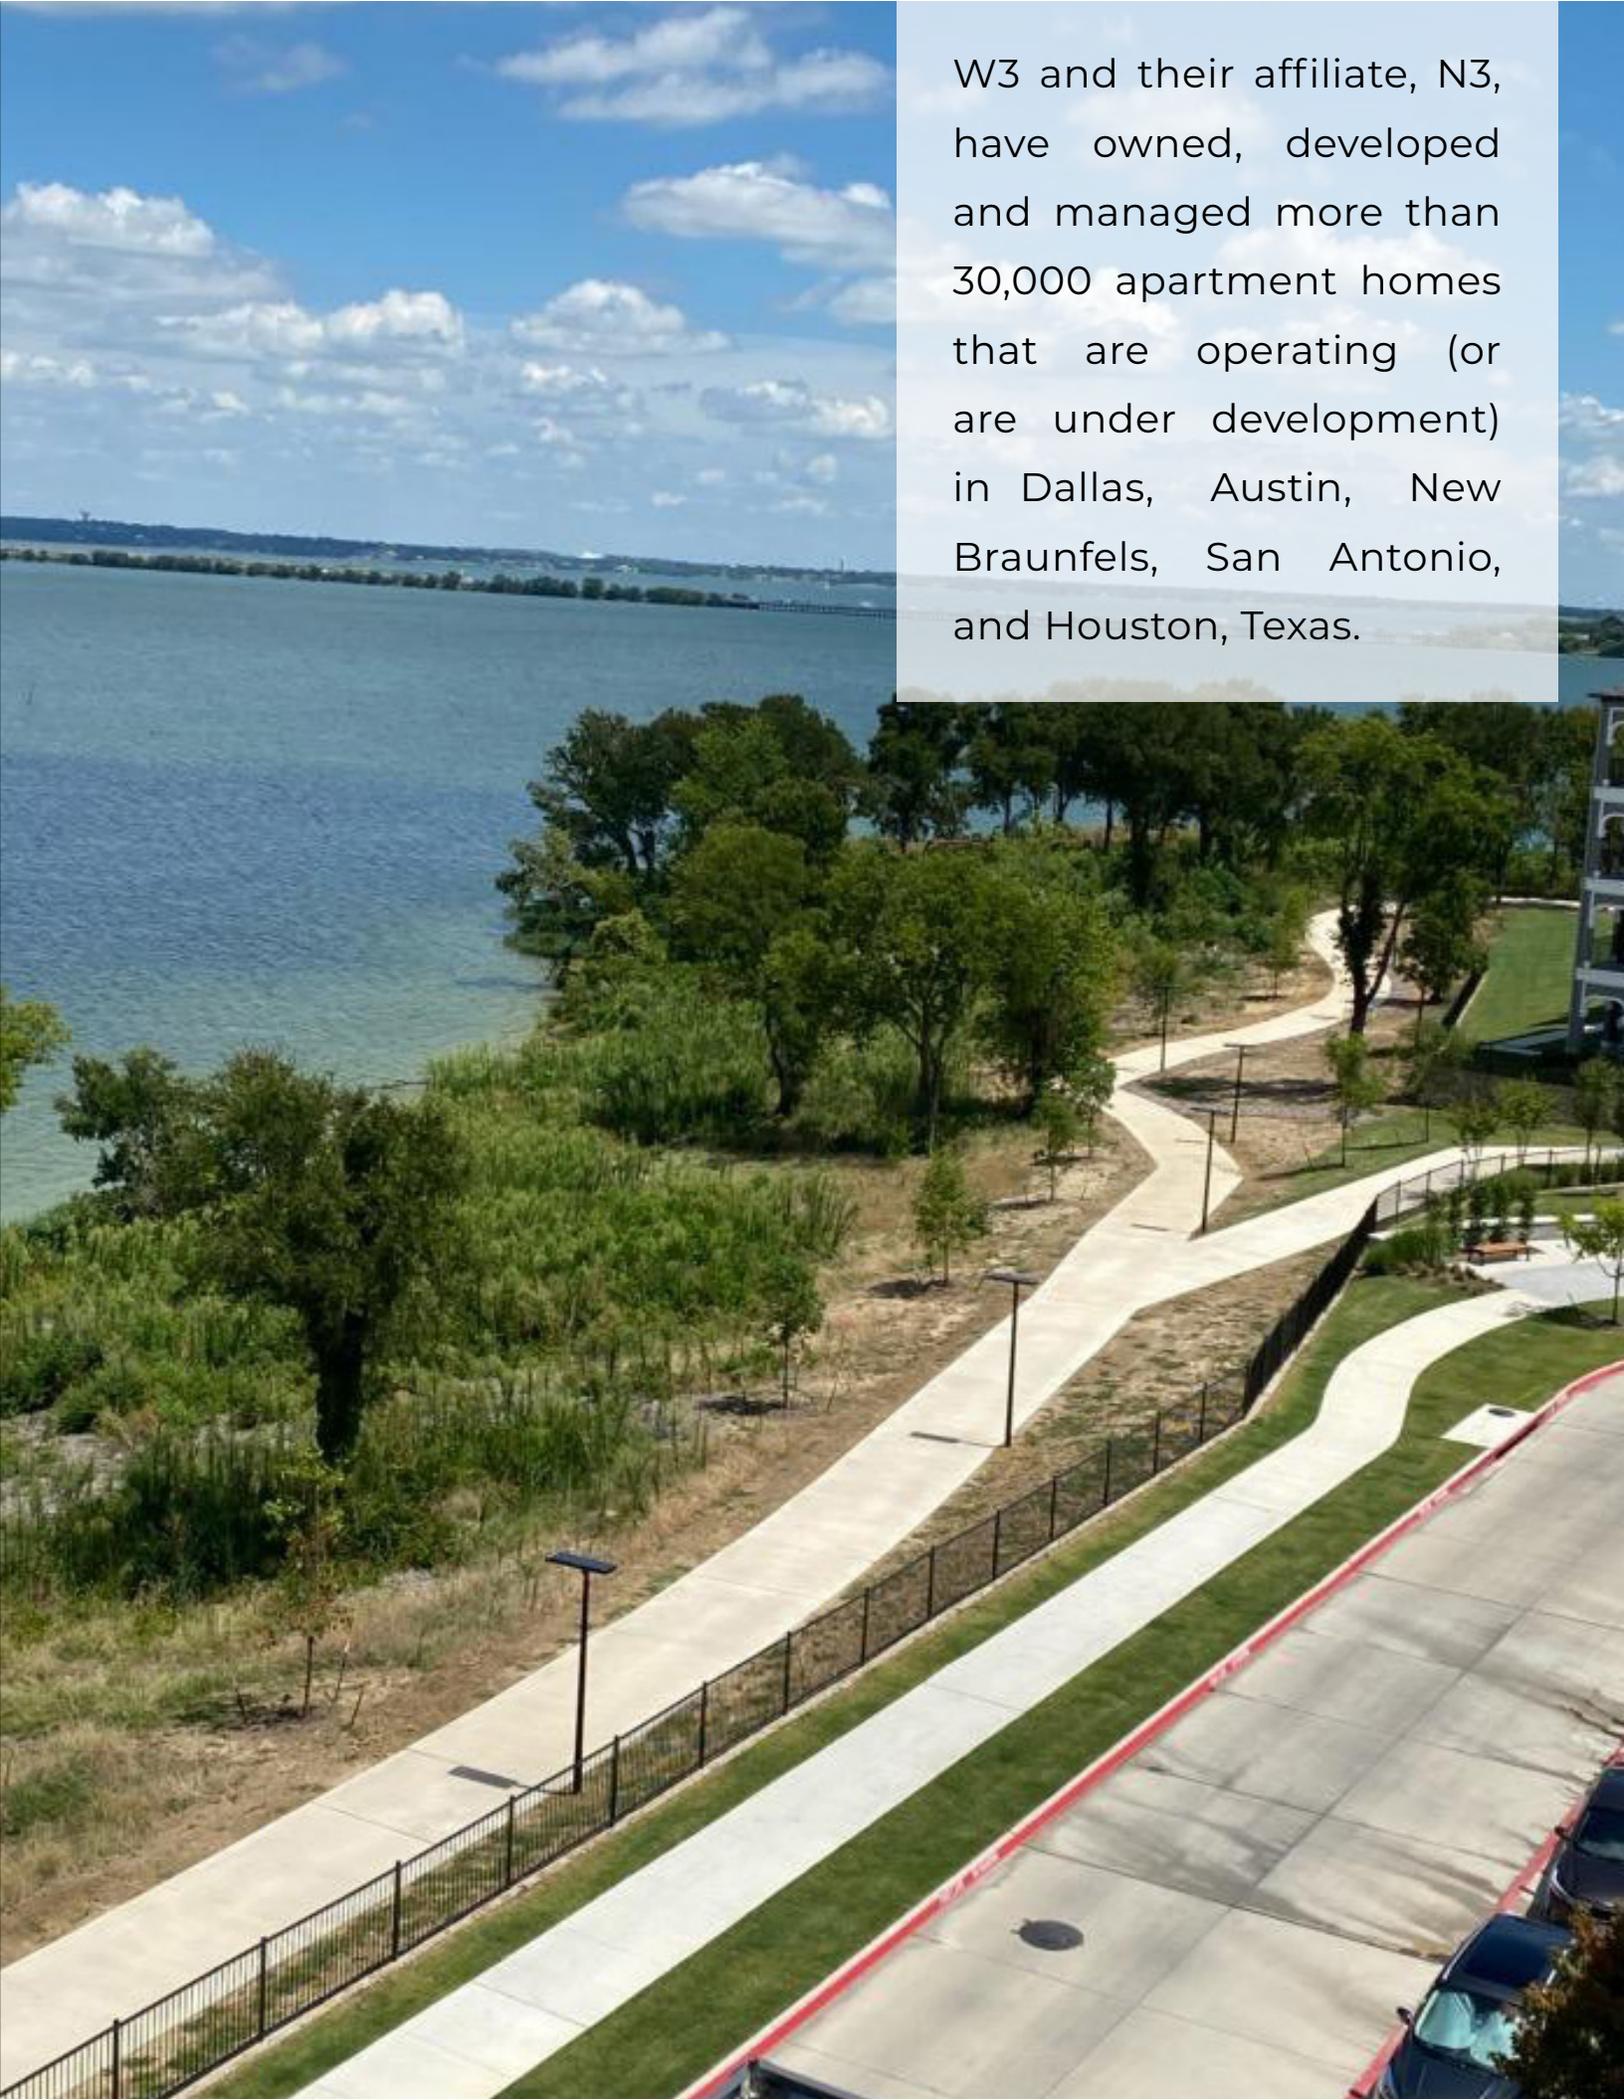

N3

LUXURY LIVING ***Rowlett, TX***

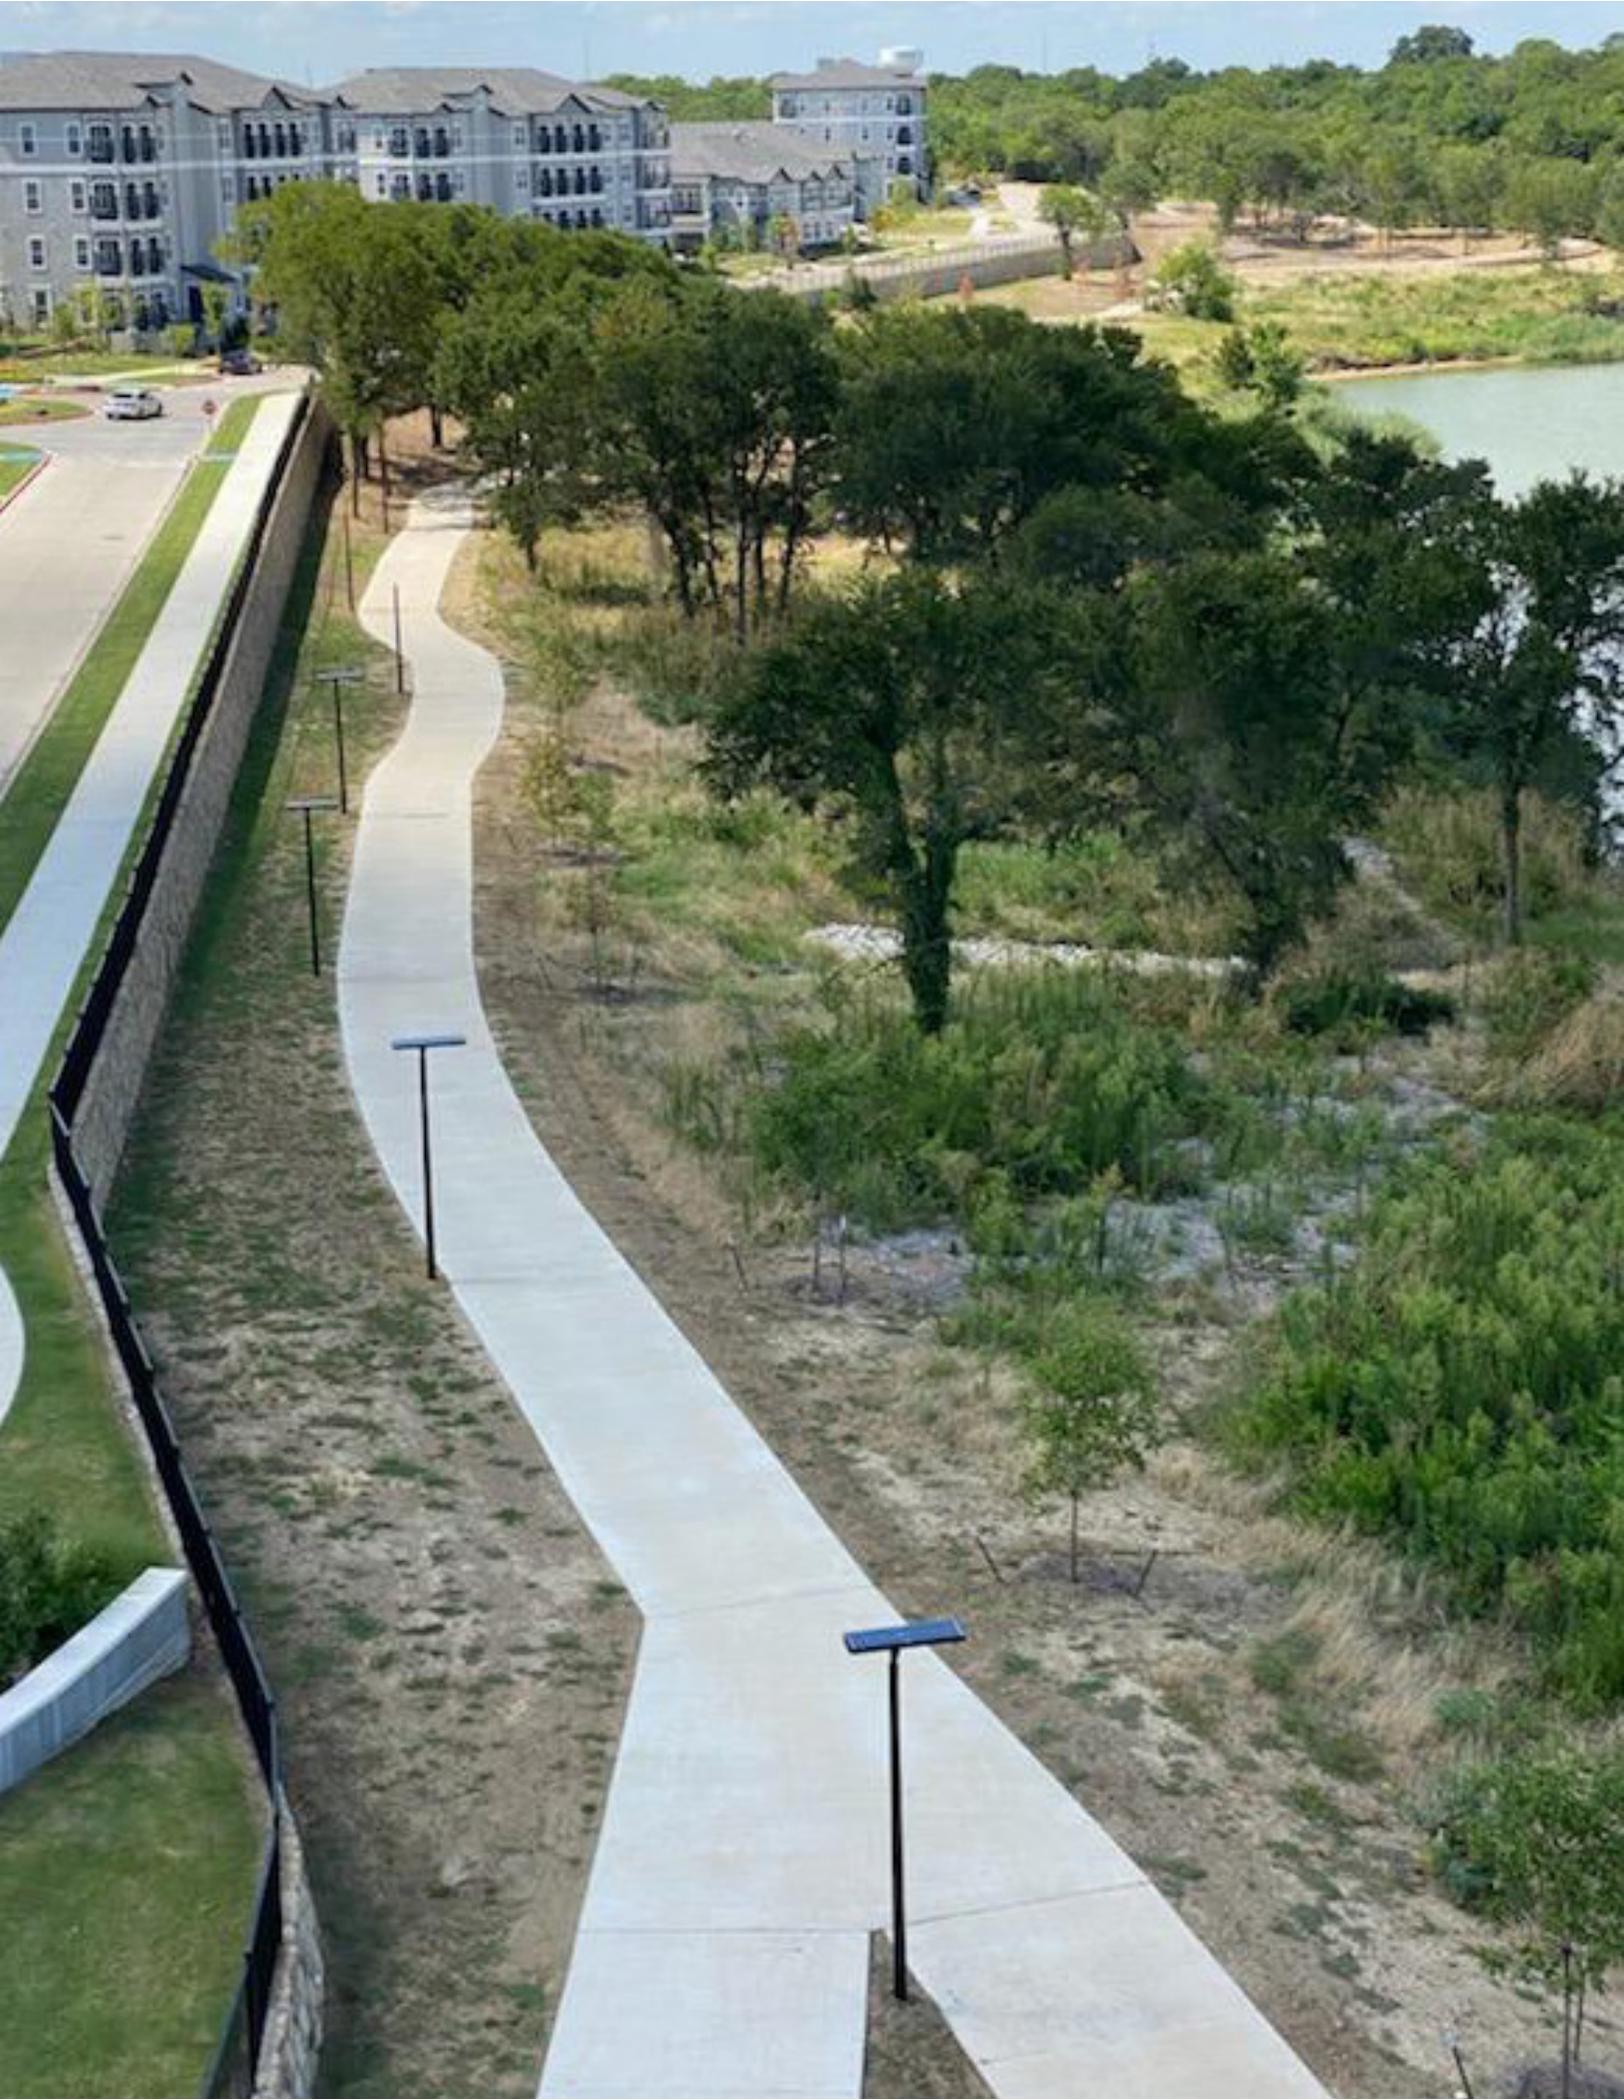

N3 Luxury Living chose Solar Lighting International, Inc. to light their community in Rowlett, Texas with our cutting-edge

Stealth Solar LED Lighting System.

W3 and their affiliate, N3, have owned, developed and managed more than 30,000 apartment homes that are operating (or are under development) in Dallas, Austin, New Braunfels, San Antonio, and Houston, Texas.

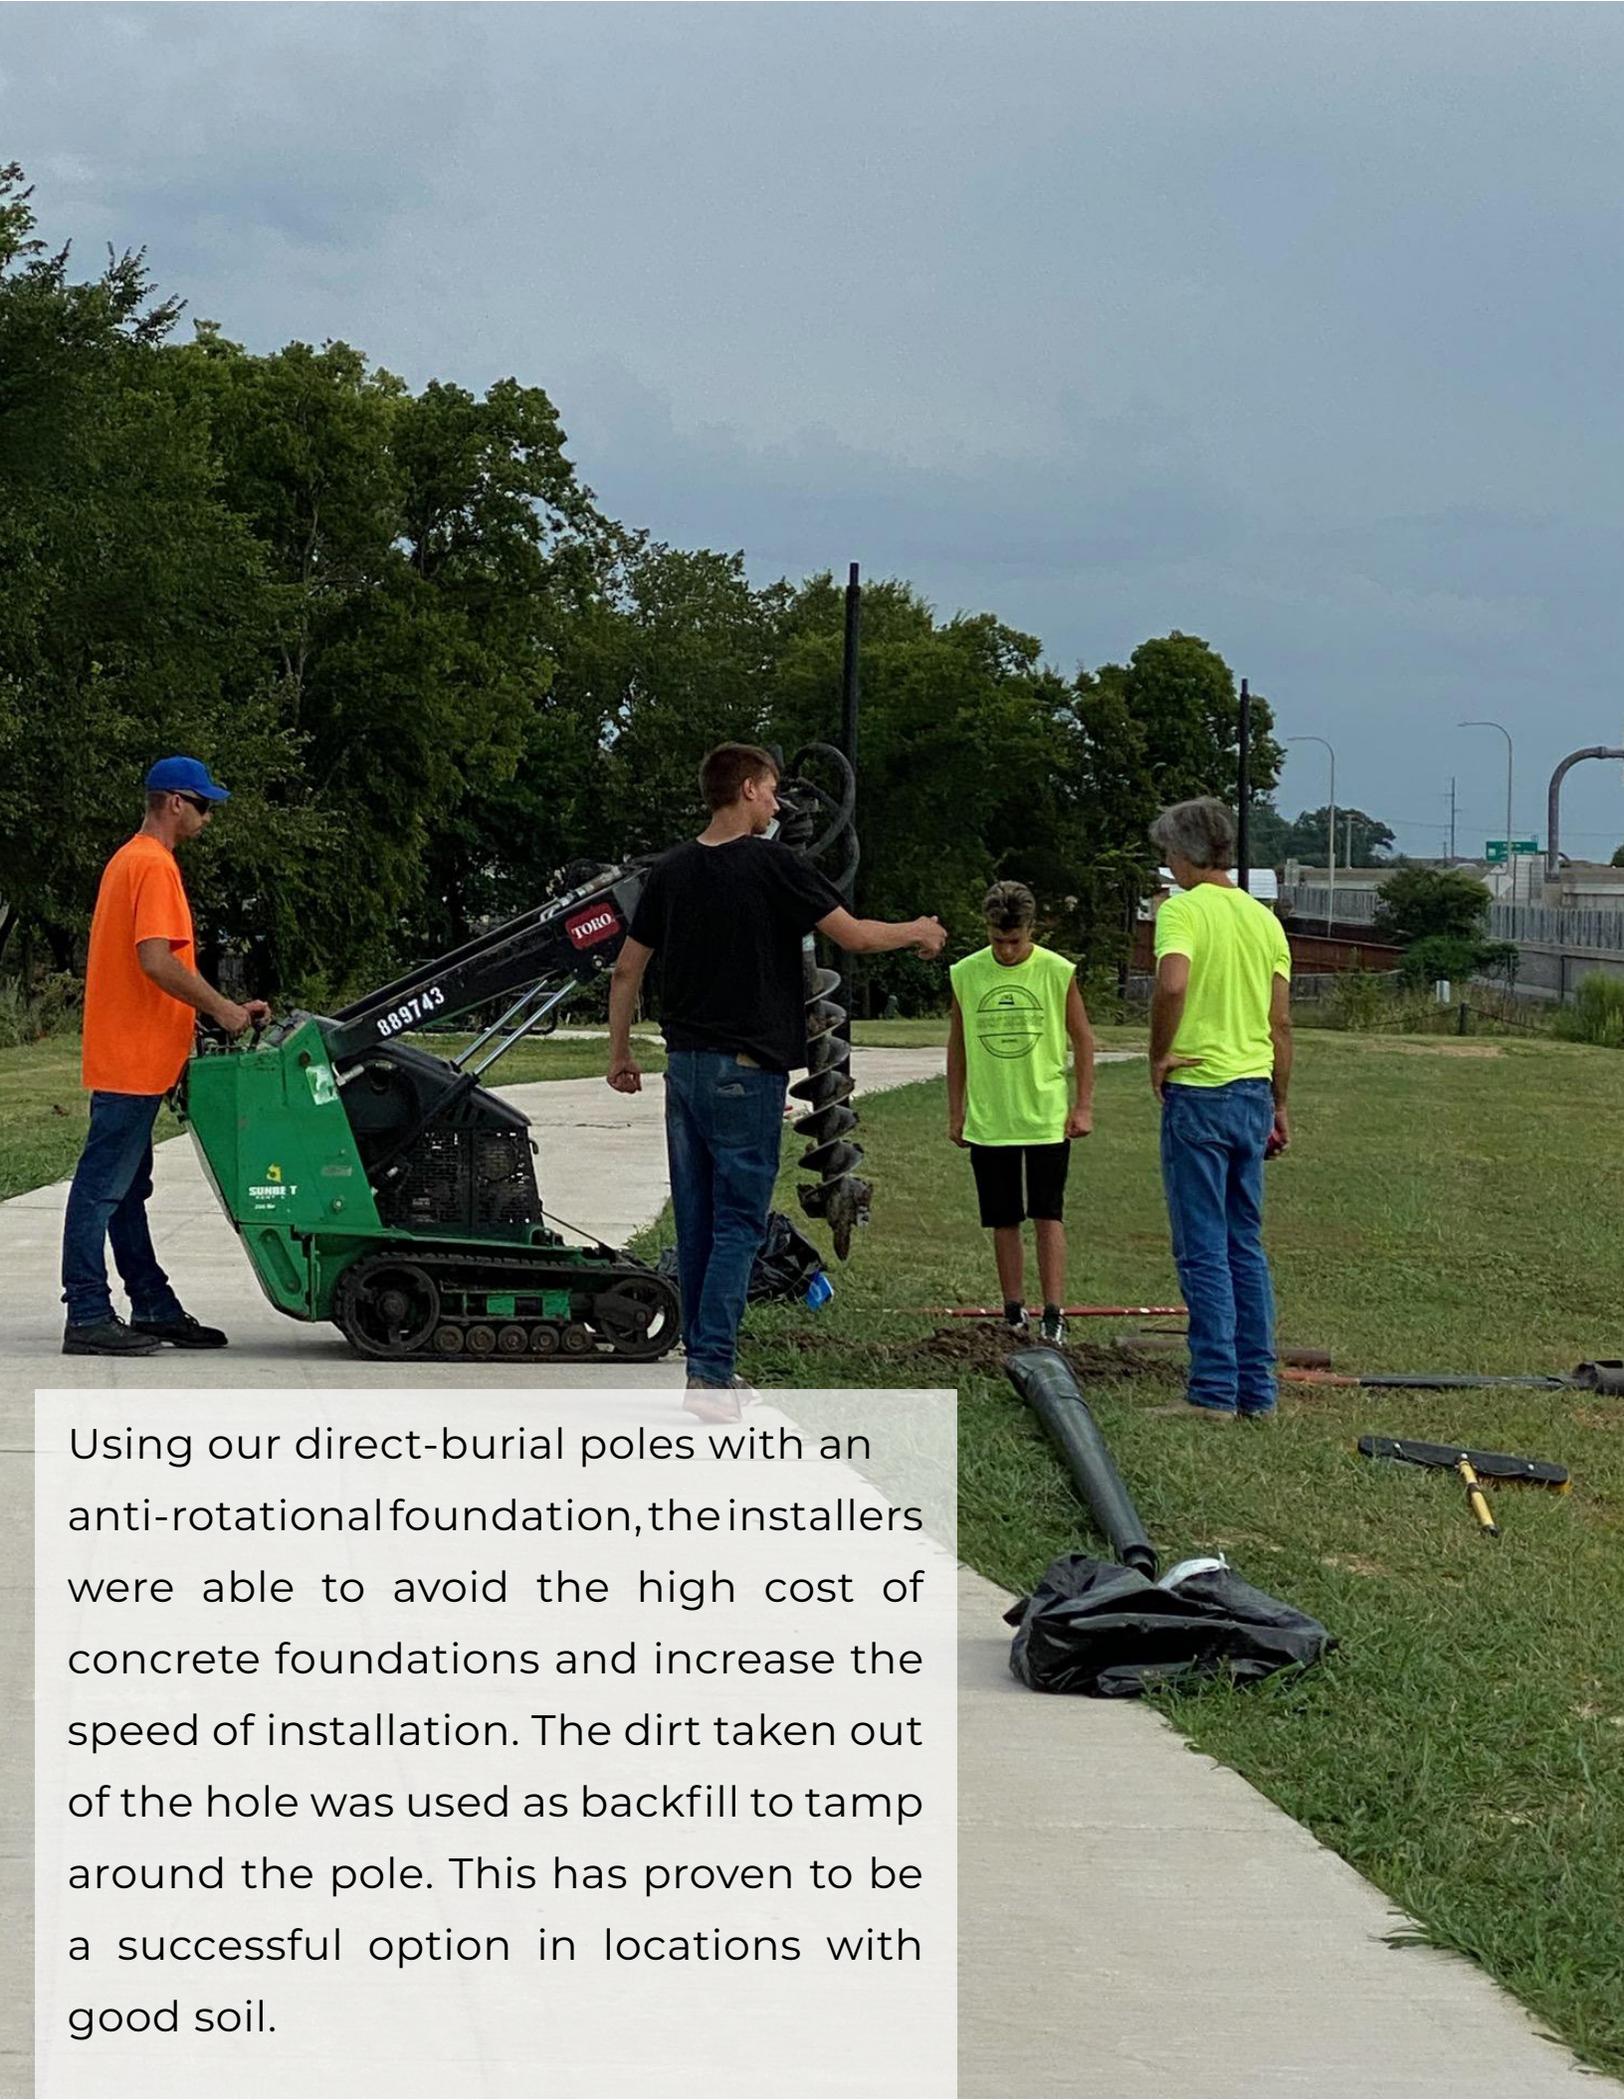

Installation

The project covered a mile of lighting using direct burial fiber composite poles, with a height of 15', and spacing at 85'. Their grounds crew was able to install 59 systems in 5 days. Meeting the county requirement for dark sky compliance, our lights provide a clean, uniform look with no uplighting or light trespass.

Using our direct-burial poles with an anti-rotational foundation, the installers were able to avoid the high cost of concrete foundations and increase the speed of installation. The dirt taken out of the hole was used as backfill to tamp around the pole. This has proven to be a successful option in locations with good soil.
