ECO-116-S12
FLASHING BEACON SERIES

The 24/7 Flashing Hazardous Warning Beacon features one 12" ultra-bright amber colored LED unit to draw drivers' attention. The beacon is solar powered which allows the freedom to locate or relocate a sign any where it is needed without the hassles of traditional wired systems.

A Clean and Clutter-Free Control Box. Solar Lighting International, Inc. utilizes just two components to operate the 24/7 Flashing Beacon Series – a sealed battery and our compact all-in-one solar controller, the SPLasher. Our design also retrofits easily to any existing sign with worry-free maintenance.

Shown with optional signage and Round Aluminum Crash Tested Pole

FEATURES

▶ 12" Beacon

▶ Ultra-Bright LED Technology

▶ All-in-One Compact Controller

▶ Auto Dimming

▶ Solar Powered
